

0925-NL SERIES - PVC BLOCKED TRUE UNION BALL VALVE

FEATURES:

- Grey PVC body, suitable for both schedule 40 & 80 pipe
- Double union / double block design permits in-line maintenance without disconnecting pipe
- Ends are blocked with bayonet style lock to prevent ball from being blown out
- Comes complete with both threaded and slip end connections
- 1/2" to 2" sizes have red handle with blue handle cap, removeable spanner
- 2-1/2" to 4" sizes have blue ABS handle, equipped with removable spanner

SPECIFICATIONS:

- Threads conform to ANSI/ASME B1.20.1
- Slip connections conform to ASTM D2466

RATINGS:

- Working Temperature Range: 41°F to 122°F (5°C to 55°C)
- Max Pressure Rating: 150 PSI @ 73°F(22°C)

CERTIFICATIONS:

- NSF/ANSI Standard 61 Certified (Drinking Water System Components - Health Effects)
- NSF/ANSI Standard 372 Certified (Drinking Water System Components - Lead Content)

MATERIAL LIST	
Name	Material
Body	UPVC
Stem O-ring	EPDM
Stem	UPVC
Ball	UPVC
Ball Seat	PTFE
End Block O-ring	EPDM
End Block	UPVC
Union O-ring	EPDM
End Connector	UPVC
Union Nut	UPVC
Handle	ABS

TEMPERATURE CORRECTION FACTOR FOR PVC VALVES

Temperature	73°F (22°C)	90°F (32°C)	100°F (38°C)	110°F (38°C)	120°F (49°C)	130°F (54°C)	140°F (60°C)
PVC Correction Factor	1.00	1.00	1.00	0.83	0.66	0.50	0.33

As temperature increases, working pressure decreases. The optimal working pressure for PVC valves is 150 PSI @ 73°F (22°C). If the temperature increases above 73°F (22°C), use the PVC correction factor to determine working pressure. Multiply the maximum working pressure by the correction factor.
