

14-(G)CB SERIES - CARBON BLOCK TASTE AND ODOUR CARTRIDGE

APPLICATION:

- Designed to remove unpleasant tastes and odours as well as sediment.
- High chlorine reduction, substantial dirt holding capacity, and greatly reduced carbon fines.
- Great alternative to traditional granular activated carbon where high chlorine reduction is needed.
- Suitable for residential, commercial and industrial applications.
- Suitable for reverse osmosis system or point of use water dispensing system.

SPECIFICATION:

- Filter media: Activated Carbon
- Filter core: Polypropylene
- End Cap: Polypropylene
- Netting: Polypropylene
- Gaskets: Neoprene

RATINGS:

- Temperature Rating: 40°F to 130°F (4°C to 54°C)
- Max Pressure Rating: 120 PSI

CERTIFICATION:

- NSF/ANSI Standard 42 Certified to reduce aesthetic impurities such as chlorine and taste/odour.

NSF/ANSI Standard 42 - Drinking Water Treatment Units (Aesthetic Effects) - Covers point-of-use and point-of-entry (POU / POE) systems designed to reduce specific aesthetic, or non-health effects contaminants (chlorine, TDS, particulates) that may be found in drinking water that is considered to be microbiologically safe.

Always Test Water - Do not use this product with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the filtration system.

Change Out - Replacement filter cartridges have a limited service life. Changes in taste, colour and flow of the water (other liquid) being filtered are signals that replacement of the cartridge may be necessary.

25 Whaley Avenue, PO Box 310, Milverton, ON CANADA NOK 1M0
