1. Ratings are independent of the contained fluid and are maximum non-shock pressures at the tabulated temperatures. Intermediate ratings may be obtained by interpolation.
2. The temperature shown for the corresponding pressure rating shall be the material temperature of the pressure retaining structure. It may be assumed that the material temperature is the same as the fluid temperature.
3. Piping loads, stresses, and moments are not taken into account.
4. Class 300 street elbows are not recommended for gauge pressures above 600 PSI.
