

N, PP, & PVC SERIES-NYLON, POLYPROPYLENE, & PVC PLASTIC INSERT FITTINGS

SPECIFICATIONS:

- Manufactured to ASTM Standard D2609 (Standard Specification for Plastic Insert Fittings for Polyethylene (PE) Plastic Pipe)
- Meet or exceed the standard burst requirements in ASTM-D2609
- Threads conform to ANSI B1.20.1
- Plastic insert fittings are not to be used with compressed gas
- Plastic insert fittings must be protected from freezing temperatures where fluid expansion due to freezing could occur

RATINGS:

- Operating temperature range: 33-73.4 °F (1-23 °C)
- Plastic insert fittings are intended for cold water applications, including well service and potable water applications
- For operating pressures over the stated maximum burst pressure requirements, or temperatures over 73.4 °F (23 °C), the use of metal insert fittings is highly recommended

CERTIFICATIONS:

- NSF/ANSI/CAN Standard 61 Certified (Drinking Water System Components - Health Effects)
- NSF/ANSI/CAN Standard 14 Certified (Plastics Piping System Components and Related Materials)

PRESSURE RATINGS FOR NYLON, PP, & PVC INSERT FITTINGS

Nominal Pipe Size	Maximum Operating Pressure at 73.4 °F	
	PSI	kPa
1/2"	200	1378
3/4"	200	1378
1"	200	1378
1-1/4"	200	1378
1-1/2"	160	1103
2"	160	1103
2-1/2"	125	861
3"	125	861
4"	125	861

ASTM D2609 BURST PRESSURE REQUIREMENTS - NYLON, PP, & PVC INSERT FITTINGS

Nominal Pipe Size	Minimum Burst Strength for Water at 73.4 °F	
	PSI	kPa
1/2"	750	5171
3/4"	630	4344
1"	630	4344
1-1/4"	630	4344
1-1/2"	500	3447
2"	500	3447
2-1/2"	400	2758
3"	400	2758
4"	400	2758

Pressure rating charts should be used as a guide only.

NYLON PLASTIC INSERT FITTINGS

Nylon insert fittings are tough, durable, and can withstand stretching and twisting. They are great for water well, underground, barn, livestock, and watering system applications. Nylon insert fittings should not be exposed to direct sunlight as the ultraviolet rays will cause the fittings to become brittle.

POLYPROPYLENE PLASTIC INSERT FITTINGS

Poly insert fittings are economical and highly chemically resistant. They are great for pool and spa applications. Poly fittings can be chosen for use with aggressive chemicals or solvents that are not suited for PVC. Polypropylene is tough and fatigue resistant, although it is not as durable as nylon or PVC.

PVC PLASTIC INSERT FITTINGS

PVC insert fittings are tough, rigid, and chemically resistant. They are great for residential, industrial, and commercial irrigation applications. PVC is not affected by ultraviolet rays so it is suitable for direct sun exposure. Because PVC is very rigid, it can be used for irrigation systems where lines are not buried below the frost line. If small amounts of water are left in the line to freeze, the rigidity of the PVC fitting will ensure the ice is forced out lengthwise as opposed to expanding the diameter of the fitting and a positive seal will be maintained.
